NU CURRENTS

Keeping our valued customers current on all things water, power, and resource conservation.

2023

Third Quarter

As we head into the second half of 2023, we wanted to update you on a few things here at Newnan Utilities. As you know, we've had long stretches of high temperatures recently. Weather events have the most dynamic impact on a utility system. High temperatures cause us all to find ways to cool our homes and use more water outside. Storms can cause limbs and trees to fall, sometimes damaging power lines. Our team works hard to protect our infrastructure through regular tree trimming and vegetation management programs, pole and transformer inspections, fire hydrant and valve inspections, and more. All of these efforts help to keep service up and running, many times despite weather events.

Speaking of weather, the water supply is always a top priority. While the weather has been extremely hot and dry, we can thank Newnan Utilities' early founders over 100 years ago for designing a reservoir system that today holds 18 billion gallons, or 300 days, of water. This system was very well-planned, especially for its time, and has served us well throughout the decades.

While the founders all those years ago planned well for our water needs, the current generation has been planning for future generations' clean energy needs. With Plant Vogtle Unit 3 entering full commercial production just a few weeks ago, and Unit 4 being cleared for fuel loading, we will be able to utilize more nuclear generation than ever before. This will lessen our dependence on coal and fossil fuels, making our fuel portfolio cleaner than ever, solidifying our commitment to protecting the environment.

While our business is utilities, we prioritize service in our community as well. Our Caring Customers program has been awarding grants to non-profit organizations that help those in need in our community. We are grateful to our customers who have made this program a success. We have also had thousands of visitors enjoy Carl Miller Park this year, and hope that you'll visit if you haven't already.

We appreciate the opportunity to serve you.

Jeff Phillips
General Manager

Intern Spotlight

Newnan Utilities' summer interns are high school and college students working in various departments throughout the company.

While they spend the summer working with us, interns learn valuable work and life skills. In addition to hands-on work in the real world, interns have the opportunity to meet contacts that may help them in future careers. When asked about the experience, interns noted that they enjoy the people they work with and are proud to have a job that helps the community.

2023 Interns

- Compost Site..... Sam Fogle
- Facilities & Grounds Jack Palmer, William Sullivan, Walker Harris, Michael Alrutz, Tripp Slaton
- Customer Service..... Leigha Tolar & Sophie Stemberger
- Carl Miller Park..... Gavin Brown, Blake Hester, Danny Horne, Bryer Roberts, David Reynolds
- Collection & Distribution Aubrey Carter, Yates Kelleher
- Wastewater Treatment Plant Kyler James

Plant Vogtle Tour

NU employees and Council members at containment building 4

Vogtle 3 and 4 cooling towers

Vogtle 3 and 4 containment buildings

Employees from Newnan Utilities, along with members of the Newnan City Council, recently visited Plant Vogtle. Plant Vogtle is a nuclear power facility located in Burke County, near Waynesboro, Georgia. It is jointly owned by Georgia Power, Oglethorpe Power Corporation, Dalton Utilities, and the Municipal Electric Authority of Georgia (from which Newnan Utilities purchases power). The plant consists of Units 1 and 2, which have been operational since the late 1980s, and Units 3 and 4, which have been under construction.

Units 3 and 4 represent a significant milestone in the United States' nuclear energy sector. They are the first new nuclear units to be built in the U.S. in over 30 years, signifying a renaissance in nuclear power. These units will harness advanced technologies and generate clean, reliable energy to meet the growing demand of approximately 500,000 homes and businesses in Georgia. Plant Vogtle is contributing to Georgia's energy portfolio while reducing reliance on traditional fossil fuels.

Some Newnan residents may be surprised to learn that much of our power already comes from nuclear energy. In 2022, Newnan Utilities' energy sources were: **43% Nuclear • 42% Gas • 11% Coal • 4% Hydro**

Recent Caring Customers Grants

Hope Revisited

Project: Downstairs Renovation Project

Funding from this grant will help to complete the renovations needed for the lower level of the Hope Revisited building. They're currently restricted to using one floor of the building, which doesn't accommodate handicapped families or families that have more than four kids. Completing the downstairs area will allow them to serve all foster families, regardless of size or disability.

hoperevisited.org

Backstreet Community Arts

Project: Art for All: Sustaining the Mission to Provide Free Access to Art

To continue their mission of providing free access to art, their grant will help fund their Wednesday afternoon open studio, which is a place of equity where resources are free to all visitors regardless of income.

backstreetart.org

Southern Conservation Trust

Project: Environmental Education in the Classroom

Funding from this grant will be used to provide in-school field trips presented by the SCT Environmental Education Programs Manager at Title I elementary schools in Coweta County. This grant will allow SCT to impact approximately 416 Coweta County elementary students by connecting them with the wonders of nature.

Caring Customers Spotlight: One Roof

For over 15 years, One Roof has worked with families in crisis in Coweta County, offering food, clothing, financial assistance, and shelter. Last year, One Roof received a Caring Customers grant to aid elderly citizens who needed help with their utility bills. Through this grant, they were able to serve **12 local households** containing **24 people**, with **\$250 of assistance per household**.
